

Bishal Thapaliya

Frontend Engineer (React)

I build production-ready React applications with a strong focus on UI quality, performance, and automated testing. Over 6 years of experience on real-world web applications in international teams. Experienced in component-driven architecture, REST API integration, and modern UI development. Hands-on experience with Cypress, Jest, and React Testing Library to prevent regressions and improve long-term maintainability.

Work experience

R&D Engineer (Frontend Developer)

Apr 2019 - Oct 2025

Bonitasoft, Grenoble

- Developed and maintained production React applications for Bonita Living Applications used by enterprise clients.
- Built reusable, scalable UI components using React, JavaScript (ES6+), HTML, SCSS, Bootstrap, and Tailwind CSS.
- Integrated and optimized RESTful APIs, ensuring reliable data flow and predictable UI behavior.
- Improved UI reliability and regression safety by implementing automated tests using Cypress, Jest, and React Testing Library.
- Refactored legacy UI components to improve maintainability, performance, and accessibility, applying semantic HTML and accessibility best practices.
- Designed and developed custom UI widgets using Bonita UI Builder to meet client-specific functional and usability requirements.
- Collaborated closely with product managers and designers to translate wireframes and prototypes (Figma) into user-centered interfaces.
- Worked with cross-functional teams (frontend, backend, QA, product) to iterate on and refine UI/UX solutions.
- Contributed to frontend quality gates by supporting test execution within CI pipelines.

Junior Frontend Developer

Sep 2018 - Feb 2019

Insiti, Paris

- Developed responsive, pixel-accurate user interfaces based on design mockups and wireframes.
- Implemented frontend functionality using HTML, CSS, JavaScript, and Bootstrap, following modern UI and responsive design principles.
- Optimized frontend code for performance, scalability, and cross-browser compatibility.
- Worked closely with designers to ensure accurate implementation of visual details, animations, and interactive behaviors.
- Collaborated with backend developers to integrate UI components with server-side logic and APIs.

Junior Frontend Developer

Jan 2018 - Apr 2018

Optilian, Paris

- Developed responsive and user-friendly frontend interfaces using HTML5, CSS3, JavaScript, and Bootstrap.
- Built dynamic UI components aligned with design mockups and usability requirements.
- Focused on clean, maintainable frontend code and intuitive user interactions.
- Gained hands-on experience integrating frontend components with RESTful web services.
- Collaborated closely with backend engineers to connect UI components with server-side functionality.

Education

MST - Information Systems

2015 - 2017

ESIGELEC

Rouen, France

M.Sc. - Computer Science

2011 - 2013

Sikkim Manipal University

Kathmandu, Nepal

Skills

Hard skills

- Responsive Design
- Cross-Browser Compatibility
- UI/UX Principles
- Accessibility (a11y)
- Debugging & Troubleshooting
- Version Control
- Problem Solving

Techniques

- Frontend Architecture
- Component-Based Development
- RESTful APIs Integration
- Automated Testing
- Agile / Scrum Methodologies

Tools

- React.js, TypeScript, JavaScript (ES6+)
- Tailwind CSS, Bootstrap, SCSS
- Jest, React Testing Library, Cypress
- Redux ToolKit
- HTML5, CSS3
- Git, GitHub
- NPM, Yarn
- Vite, Webpack
- Figma, Photoshop
- Slack, Jira, Trello
- Wordpress
- Node.js, Vue3 (basic)

Language

- English (Fluent)
- French (Intermediate)
- Nepalese (Native)
