PROFESSIONAL PROFILE

QA Engineer with 6+ years of experience in frontend development and quality engineering within Agile product teams. I began my career as a Frontend Engineer building React applications while writing automated UI tests alongside feature development. This naturally evolved into a Frontend QA Engineering role focused on test automation, regression testing, accessibility, API validation, and release quality.

PROFESSIONAL EXPERIENCE

Frontend QA Engineer

Ofelia (formerly Bonitasoft) • Grenoble, France — Jan 2023 - Dec 2025

Internal Career Transition • React Product Team • Agile Scrum

- Designed and maintained Playwright and Cypress E2E automation suites covering critical user journeys, regression-prone functionality, and key frontend workflows.
- Owned frontend quality validation across functional, regression, smoke, integration, exploratory, UI, and accessibility testing throughout the development lifecycle.
- Validated REST API communication, payloads, HTTP status codes, and frontend/backend synchronization, including responsive and cross-browser behavior across Chrome, Firefox, Safari, and Edge.
- Built comprehensive test scenarios covering filtering, sorting, pagination, CRUD operations, error handling, and edge cases, using Cucumber/Gherkin, API mocking, and test fixtures.
- Ensured WCAG accessibility compliance through keyboard navigation and semantic HTML validation, while reporting, reproducing, prioritizing, and tracking defects in Jira.
- Leveraged AI-assisted coding tools including Claude Code, GitHub Copilot, and ChatGPT to accelerate test-case generation, troubleshoot automation failures, identify edge cases, and improve test coverage and productivity.

Frontend Engineer

Bonitasoft, Grenoble — Apr 2019 - Dec 2022

- Architected and maintained enterprise React applications for workflow automation, including Bonita Central, a real-time dashboard for CPU and node performance monitoring.
- Developed reusable React and TypeScript components and integrated REST APIs while optimizing asynchronous state management, rendering efficiency, scalability, and maintainability.
- Developed unit, component, and E2E tests using Jest, React Testing Library, Playwright, and Cypress, including Cypress/Cucumber automation for legacy AngularJS and Vanilla JavaScript applications with REST API mocking.
- Embedded automated UI validation into development workflows, identifying defects early and reducing post-release regressions while improving overall frontend reliability.

Frontend Developer

Insiti, Paris — Sep 2018 - Feb 2019

- Developed responsive production-ready interfaces from Figma mockups.
- Built reusable frontend components with JavaScript, HTML5, CSS3, and Bootstrap.
- Integrated REST APIs to display and manage application data.
- Ensured pixel-perfect UI implementation with designers.
- Improved accessibility, responsiveness, and browser compatibility.
- Worked within Agile Scrum development processes.

Junior Frontend Developer

Optilian, Paris — Jan 2018 - Apr 2018

- Developed responsive web interfaces using HTML5, CSS3, JavaScript, and Bootstrap.
- Fixed UI bugs and improved browser compatibility.
- Implemented reusable layouts and collaborated with senior developers.
- Tested newly developed features before deployment.
